- GENERAL NOTES**
- Drawing illustrates design intent, used for planning purposes.
  - Do not scale from this drawing.
  - Drawing to be read in conjunction with all relevant plans and documents associated with this project.
  - Design proposals are indicative, all surveyed information is provided by others.
  - All existing and proposed dimensions, levels and location to be checked and verified prior to construction.

**Bird and Bat Boxes**  
 As the proposed development type and site conditions shall not provide suitable habitat for foraging and commuting bats, or foraging birds, it is proposed to locate the bird and bat box enhancements within the existing woodland screen to the north-west of the site.  
 The boxes shall comprise 2 x Schwegler 1F Bat Box, 2 x Schwegler 1B Bird Box and 2 x Schwegler 3S Starling Box (or similar products if not available).  
 Suggested box locations are indicative and can be confirmed on-site by an Ecologist when boxes to be erected. However in all cases, boxes to be positioned 4 to 5m high on the main stem of a suitable tree in a location where a clear flight path to the box entrance is provided (i.e. not cluttered by branches or leaves). Although these boxes shall likely be shaded, it is also best practice to avoid south-facing positions for bird boxes as excessive exposure to direct sunlight can cause chicks to overheat in the nest.
